

Nomad

Richie Kotzen

Is it you and your pride is it you in denial?
You gonna step in the light you gonna fight for the title
I keep giving you time but i don't even like you
And then i look in your eyes and then i tell you i love you

No sane woman would keep me nomad i am
No higher power beats me holes in my hands

Better stay in the light better sleep with the light on
You think you're reading my mind
You should be reading the bible and get saved
I see you wade for a while but i been swimming for miles
And i say run from me run from me run from me run

No sane woman would keep me nomad i am
No higher power to breach me holes in my hands

Another smack in the head why don't you beat me to death
And then go preaching the word
Just like a print in the sand you're gonna vanish and pass
And nothing will last

No sane woman would keep me nomad i am
No higher power beats me hole in my hand

My own mother won't beat me or kiss my hand
I'm dealing my own religion holes in my hands
Estranged nomad you'd better know
My own life won't teach me my own life won't teach me
