

Make Your Move

Rick Springfield

Me and you
Us against them, we two
But this game is far from through
We're caught in their chess game coup
Have they sealed my white Queen's fate?
Did I rally my knights too late?
Not sure whose side you take
Will you finally call "checkmate"?

Make your move why won't you stand up and fight for us
Make you move we could be lost in the wilderness
A spiral groove we get caught up in our humanness
Make your move or this fight we fought will be meaningless

You and me
All I wanted us to be
But lovers don't play for free
Let's finish this game and see

Make your move why won't you stand up and fight for us
Make you move we could be lost in the wilderness
A spiral groove we get caught up in our humanness
Make your move or this fight we fought will be meaningless

Make your move its time to walk through the fire for us
Make you move cross the barbed wire of self-righteousness
Try to prove once and for all we're not powerless
Make your move don't let this game be the end of us
Make your move
Make your move
Make your move
Make your move
