

# Last Night

Ricki-Lee

Makin' love, I'm all over you, you're all over me  
It's taken us, a couple of shots, a couple of hours  
You took my hand, you screwed all my plans  
It's moving so fast, but let's make it last

So whisper sweet nothings all in my ear  
Been craving to be alone with you here  
The tension so strong it's becoming so clear that...

If this is our last night, I only wanna spend it with you  
It feels right, I like it when you do like you do  
I'll tell you baby, it's only you (only you)  
Last night, I only wanna spend it with you  
It feels right, I like it when you do like you do  
I'll tell you baby, it's only you (only you)

Wakin' up, you're all over me I'm all over you  
That crazy love, it's outta control and you got that hold  
I wish I could lay here with you all day  
Got no time to waste but say the word and I'll stay

So come whisper sweet nothings all in my ear  
Been craving to be alone with you here  
The tension so strong it's becoming so clear  
So tell me baby what you gonna do

If this is our last night, I only wanna spend it with you  
It feels right, I like it when you do like you do  
I'll tell you baby, it's only you (only you)  
Last night, I only wanna spend it with you  
It feels right, I like it when you do like you do  
I'll tell you baby, it's only you (only you)

Can we make it go on and on and on  
If this is our last night, oh I keep holding on and on and on  
If this is our last night, I only wanna spend it with you

If this is our last night, I only wanna spend it with you  
It feels right, I like it when you do like you do  
I'll tell you baby, it's only you (only you)  
Last night, I only wanna spend it with you  
It feels right, I like it when you do like you do  
I'll tell you baby, it's only you (only you)
