

Pulsar

Ride

You can never see it shine like I always wanted to
There's something in a way all you missing again, and again
Still shimmer holding out always be mean over to you
So very far away I hope it gets the speed of it

Like the summer always fainted and the wind gets cool on your skin

You know that something was will never be here again
Weak learner in a talk give a life we have on a road
Sometimes another one can let you know that you're there
Always keep your eyes on the pulsar
Driving you home from wherever you are
We are on a way home from another star
It's been so long and we've come so far
We've come so far
