

Shadows Behind The Sun

Ride

Living in these shadows
I can't live there anymore
The once high are falling so far
Those words are always with me
My brothers in the dark
Friends or foes
I can't tell them apart

Mistaken identities
My old me is killing me
This world breaks everybody now
At the broken places be strong
Many words without voices
Echoes more that's lost than won
In the shadows behind the sun

Words go way beyond me
I can't hear them anymore
Words fail me, n' all I've lived for
Those voices always with me
My sisters in the dark
Commotions in oceans
Tears it all apart

Mistaken identities
My old me is killing me
This world breaks everybody now
At the broken places be strong
Many words without voices
Echoes more that's lost than won
In the shadows behind the sun
Only shadows behind the sun
In the shadows behind the sun
Only shadows behind the sun
