

Find Love

Riff Raff

(Oh My God, Ronny!)

First you get your money up and then you find love
First you get your money up and then you find love
If life was that easy then we wouldn't find drugs
Written in the stars, you might find it in the club
First you get your money up and then you find love
First you get your money up and then you find love
If life was that easy then we wouldn't find drugs
Written in the stars, you might find it in the club

Spend a million hours tryna make a perfect life
Spend a million dollars tryna find a perfect wife
You can buy love but your future won't be bright
Love without passion is like syrup with no Sprite
Things fall in place when it's really meant to be
Will I find her or will she find me
I'm really down to earth despite what you may believe
But do I have a choice if it's in my destiny

First you get your money up and then you find love
First you get your money up and then you find love
If life was that easy then we wouldn't find drugs
Written in the stars, you might find it in the club
First you get your money up and then you find love
First you get your money up and then you find love
If life was that easy then we wouldn't find drugs
Written in the stars, you might find it in the club

I wonder, would my life change if I had a kid
Maybe one day I might have a lil' RiFF
Or a little girl with Versace baby bib
Raised 3 huskies so I know what love is
Had my heart broke so I know what love ain't
Rather get my stacks up, sip big drank
Rather cop a chain, big house on a lake
Is she in my future or the one that got away

First you get your money up and then you find love
First you get your money up and then you find love
If life was that easy then we wouldn't find drugs
Written in the stars, you might find it in the club
First you get your money up and then you find love
First you get your money up and then you find love
If life was that easy then we wouldn't find drugs
Written in the stars, you might find it in the club
