

## Place I Know (The Fairy Song)

Right Said Fred

There's a place I know  
Where the fairies go to put the world to rights,  
And the universe  
In darkened dells and with magic spells  
Working through the night, got to get it right

What would you know if you never try?  
To see the good in anything  
What would you know if you've only known?  
We expected more than this  
Nine to five and mortgages  
Sunglasses on, let's find the sun  
And have a lovely day

There's a place somewhere  
Where the rules are fair and angels referee  
I bet it's heavenly  
Goals get scored but you always score  
And no one ever lost  
Or got slightly cross

What would you know if you never try?  
To see the good in anything  
What would you know if you've only known?  
We expected more than this  
Nine to five and mortgages  
Sunglasses on, let's find the sun  
And have a lovely day

There's a place I know  
Where the fairies go, and I should know  
Where the fairies go  
In darkened dells and with magic spells  
Working through the night, got to get it right

What would you know if you never try?  
To see the good in anything  
What would you know if you've only known?  
We expected more than this  
Nine to five and mortgages  
Sunglasses on, let's find the sun  
We'll have a lovely day  
We'll have a lovely day  
Where's my bikini?  
We'll have a lovely day
