

# Kill The Lights

Righteous Vendetta

You know I'm here to rock this whole world right  
But something's got you cornered, got you worried, got you up tight

Just let it go and be free tonight  
Hit the lights now, black out, got your back, you got mine  
Beware the wolves, they hunt in shadow so the darkness hides the motive  
A selling point to take control of all this, all this I'm saying

Kill the lights, you know we own the night  
Dead on the outside, alive on the inside  
Black and white, when it's wrong it's right  
Alive on the outside, dead on the inside

It's an uphill battle, that's what we're alive for  
Singing I am not afraid  
I'm convinced I've got my chips all in  
That's who you see on the outside  
It's not the same as who's within

Beware the wolves, they hunt in shadow so the darkness hides the motive  
A selling point to take control of all this, all this I'm saying

Kill the lights, you know we own the night  
Dead on the outside, alive on the inside  
Black and white, when it's wrong it's right  
Alive on the outside, dead on the inside

Beware the wolves, they corner you in isolation  
Save it, tell me what is happening  
Your true identity is marked by the standard you live for  
So can you tell me who you're favoring  
I know everything you say is the right word  
But where it comes from is the heart of a liar  
Just be who you say you are

Kill the lights, you know we own the night  
Dead on the outside, alive on the inside  
Black and white, when it's wrong it's right  
Alive on the outside, dead on the inside
