## So Long

## **Righteous Vendetta**

Brace yourself from the moment of impact With every breath I draw closer to you You are a liar You wanna fear it Blinded eyes

This is the point of no return
You'll never look back when you hear my word

So long
We won't bend, we won't break
And we shout so long
Until the end we will fight on
So long
We won't bend, we won't break
And we shout so long
Until the end we will fight on

You think an army can stop me? A million men are gonna die You are a liar You wanna fear it Blinded eyes

This is the point of no return
You'll never look back when you hear my word

So long
We won't bend, we won't break
And we shout so long
Until the end we will fight on
So long
We won't bend, we won't break
And we shout so long
Until the end we will fight on

Not an army that can stop me There's not an army that can stop me

Feel the Earth quake at my voice Let the seas pour forth I will summon the mountains to crush you And the seas will surely drown you too

So long
We won't bend, we won't break
And we shout so long
Until the end we will fight on
So long
We won't bend, we won't break
And we shout so long
Until the end we will fight on
So long
We won't bend, we won't break
And we shout so long
Until the end we will fight on
