

Strangers

Righteous Vendetta

I can't break free

Deep down I know

In your soul I still have you

You don't understand when you're all alone

You still think of how it used to be when I was always there, always there

There's just no way

I can't break free

You will always be the one

I will run to out of the darkness

You'll be the one who won't fade out

Forever in love but I know

We're strangers for now

Your face says it all

In your eyes I see your soul

You can't understand why you feel alone

It reminds you how it used to be when I was always there, always there

There's just no way

I can't break free

You will always be the one

I will run to out of the darkness

You'll be the one who won't fade out

Forever in love but I know

We're strangers for now

We're strangers just for now

We're strangers for now

You will always be the one

I can't break free

You will always be the one

I can't break free

You will always be the one

I will run to out of the darkness

You'll be the one who won't fade out

Forever in love but I know we're strangers for now

But I know we're strangers just for now

But I now we're strangers for now

I can't break free
