

Take Over

Righteous Vendetta

You feel us rising
We're taking over
This is war then
We're taking over
We're taking over
We're taking over

Words unspoken now
Show me how it use to be
When everything was simple
When everything was easy

With the pieces in my hands
I'm ready to face the dark
Every step I take
Is getting harder and harder

You feel us rising
We're taking over
This is war then
We're taking over
Stand, til there's nothing left
Fight, until your dying breath
Live, with no regrets
We're talking over, yeah

Give up your lives, give up your guns
This is a take over
If you want to live, say leave and you'll be ran over
We have you locked in every minute
You want to make it out alive
Expect a take over

With the pieces in my hands
I'm ready to face the dark
Every step I take
Is getting harder and harder

You feel us rising
We're taking over
This is war then
We're taking over
Stand, til there's nothing left
Fight, until your dying breath
Live, with no regrets
We're talking over

(You feel us rising)
(We're taking over)

Let the flame come and take you in
It only burns for a moment
Let the flame engulf your skin
Let your mind embrace the silence

(You feel us rising)
(We're taking over)

You feel us rising
We're taking over
This is war then
We're taking over
Stand, til there's nothing left
Fight, until your dying breath
Live, with no regrets
We're talking over, yeah
We're taking over
We're taking over
We're taking over!
