

# Buried Alive

RILEY

Yeah I've been up and down  
Trying, trying to find some way out  
Some way out

I know I'll be okay  
She living with a heart so cold  
Can't find a way, now

Yeah let me tell 'em I never wanted anything but a lil time baby  
You kept me on the side baby  
I know I'll blow your mind baby  
Never saw the city lights shining this bright baby  
You said its ride or die baby

I know, I know  
Maybe you're home  
And now I'm alone  
I find myself listening, listening  
I know I've been rough  
Now I've found myself listening, listening

I'm buried alive, buried alive

Try and come and find me, find me  
I've been up and down now here for a minute  
I know that you thought that us was so wrong  
But he won't love you better than me when I'm gone

Girl I know that you will, yeah  
I know you better do the things that you say you were, say you were  
It's hard for me to sleep now that I know you're still here calling  
You know I let my guard down, thought we were onto something  
So hard to take this  
Maybe we'll make this

Cause maybe you're home  
And now I'm alone  
I find myself listening, listening  
I know I've been rough  
Now I've found myself listening, listening

Buried alive, I'm buried alive  
No one can save me now  
You wanted everything that I just couldn't give

No one will love you  
Better than I can  
No one will love you  
Better than I can
