

INCOMPLETE

RILEY

She needs a second to breathe
She always gets it from me
She knows I'm just what she needs (Oh yeah)
But she feels incomplete

Please don't run away from what you've become
You'll fit in this place
I know you get scared at night, you'll be alright
You never could end up replaced

She always running away from the surface
She wanna hide from this place (Hide from this place)
She don't know she damn near perfect
Know she can't be replaced (Can't be replaced)
I know that you been lied to
But I will try to be there when it's getting late
She always running away from the surface
She wanna hide from this place
(Oh yeah, oh yeah, ay)

She know I need her
She know that I'm gonna be there for her
You're on my mind
I spend time and I'm here to be here for you
It's hard to trust me
But baby please don't just end it this way

Please don't run away from what you've become
You'll fit in this place
I know you get scared at night, you'll be alright
You never could end up replaced

She always running away from the surface
She wanna hide from this place (Hide from this place)
She don't know she damn near perfect
Know she can't be replaced (Can't be replaced)
I know that you been lied to
But I will try to be there when it's getting late
She always running away from the surface
She wanna hide from this place
(Oh yeah, oh yeah, ay)

She always running away from the surface
She wanna hide from this place
She don't know she damn near perfect
Know she can't be replaced
I know that you been lied to
But I will try to be there when it's getting late
She always running away from the surface
She wanna hide from this place
