

Remedy

Rilès

Got no way
Tho I tried
Happy songs
Shady mind
Got no way
Tho I tried
I need you
Why don't you reply?

Baby hit me up
I'm not fine
I need what you can do
Darling hit me up
I'm not right
I want you to come through

Baby hit me up
I'm not fine
I need those sweet words, boo
Need to hear the song of your voice
Something to switch the mood
Only you can master your hands
Better than Art Tatum
You're my remedy when I'm down, down

You're my remedy
It's all I need
Don't want no pills
Just you and me
I love your curves and when you speak
It's either you or Hennessy
I know Real Talk' made me look like beast
I know for sure that you despised me
Let's forget that and pick up my rings
Tonight I'm free
But tomorrow I mix

Baby hit me up
I'm not fine
I need what you can do
Darling hit me up
I'm not right
I want you to come through

Suzanne_04 sends me nudes on Snapchat
She wants to come over
I know it ain't for chit-chat
She might have a fat ass
But she ain't got what you got
I'm not looking for girls
I'm looking for a cure now
The worst is yet to come
Allow me to forget that
One more time, one more time
Darling punch me up in the mind
Electrify my mood
Shot down all my dreariest thoughts

Murder my demons too
Being yourself is just all I ask
The rest will follow you, follow you

Baby hit me up
I'm not fine
I need what you can do
Darling hit me up
I'm not right
I want you to come through

I spent too much time in my head
I lost the track of you
I find my balance in excess
I always overdo
Trying to get back in myself
Can't do it without you
Kiss my scare
When this world is crackin' open all my wounds
I spent too much time in my head
I lost the track of you
I find my balance in excess
I always overdo
Trying to get back in myself
Can't do it without you, without you

Baby hit me up
I'm not fine
I need what you can do
Darling hit me up
I'm not right
I want you to come through
