

Let's Change The World

Ringo Starr

Every night I dream of words in a half unfinished song
There's a language born out of peace and love in all of us
When I'm feeling lonely I just start singing a tune
Anger falls away like the rain washing over you

Let's change the world
A day at a time till we get it down
Let's change the world
There's more than enough love to go around
Let's change the world
Raise up your voices and sing it out
Let's change the world

Close your eyes and hum tonight
And it will be all right
Just tune in to the universal melody

When trouble comes I remember
It's time for singing a tune
Fear will wash away just like the rain washes over you

Let's change the world
A day at a time till we get it down
Let's change the world
There's more than enough love to go around
Let's change the world
Raise up your voices and sing it out
Let's change the world

When trouble comes I remember
Its time for singing a tune
Fear will wash away just like the rain washes over you

Let's change the world
A day at a time till we get it down
Let's change the world
There's more than enough love to go around
Let's change the world
Raise up your voices and sing it out
Let's change the world
Music and Love is what it's all about
