

About Damn Time

Rise Against

A death knell sounds
No matter where I go
Cities or small towns
All I want is something to call my own
But I'm in the dark now

We set out confidently
But what if we are wrong
We should have been there long ago
Shouldn't take this long
We stumbled accidentally
To a place unknown

It's about damn time we swallow the pain
Before it spreads
The memories we don't wanna know
I still wake up with the same song
And it's
Stuck in my head
The melody always takes me home
Take me home
(Take me home)

I'm standing now waiting with both eyes closed
Whatever's next
A fist smashing down
Black eyes or broken bones
Maybe a soft kiss

I'm tired of always guessing
Whether the sky will fall
Each time I learn my lesson
I forget it all
The time we spent preparing
We always miss it all

It's about damn time we swallow the pain
Before it spreads
The memories we don't wanna know
I still wake up with the same song
And it's
Stuck in my head
The melody always takes me home
Take me home

To save a broken branch
We cut them in half
She said "I wish I could help you"
I said "You already have"

It's about damn time we swallow the pain
Before it spreads
The memories we don't wanna know
I still wake up with the same song
And it's
Stuck in my head
The melody always takes me home

Take me home, take me home
