

Supernova

Rivals

You can say that you want me
We both know that ain't true
The whole world phases
Dimensions of me that don't involve you
You can see me on the skyline
Walking so far away from this
These stars are clusters
A waste of time that I won't miss

(Ooh-ooh-ooh-ooh-ooh)
Cosmos, I can feel it in the air
Counting down as we reach the final hour
No more me, no you
(Ooh-ooh-ooh-ooh-ooh)
Cosmos, I can feel it in the air
Hear you preach about our problems
Supernova, this is over

Supernova, this is over
Supernova, this is over
You can't come back, our love went black
Better believe you will never get me
You can't come back, our love went black
Better believe you will never get me

If you ever think
I actually cared at all
I wasted my time
Explosion in us that brought our fall
If I catch fire
You won't take that burn
When I walk away
Your illusion in us, you can't return

(Ooh-ooh-ooh-ooh-ooh)
Cosmos, I can feel it in the air
Counting down as we reach the final hour
No more me, no you
(Ooh-ooh-ooh-ooh-ooh)
Cosmos, I can feel it in the air
Hear you preach about our problems
Supernova, this is over

Supernova, this is over
Supernova, this is over
You can't come back, our love went black
Better believe you will never get me
You can't come back, our love went black
Better believe you will never get me

Supernova, this is over
You can't come back, our love went black
Better believe you will never get me
You can't come back, our love went black
Better believe you will never get me
Supernova, this is over
