

All of My Friends

River Whyless

All of my friends got hooked up last night
And I got wired to
Everyone I know is talking through space
I just wanna touch you

Show me what a body feels like in my hands
It's hard to remember
I've been looking for a new god of some kind
Call me and we'll get together

Tell me now when this went wrong
Tell me now when our words became empty
It was a cold sentence, maybe I'm a helpless thing
It was a cold sentence, maybe I'm a helpless thing

All of my friends got hooked up last night
And I got wired to (and I got wired too)
Everyone I know is wandering through space (through space and time)
Now I'm feeling lost too
Maybe when the bees come
Maybe when the bees come

Tell me now when this went wrong
Tell me now when our words became empty
Tell me now when this went wrong
Tell me now when our words became empty
It was a cold sentence, maybe I'm a helpless thing
It was a cold sentence, maybe I'm a helpless thing
It was a cold sentence, maybe I'm a helpless thing
It was a cold sentence, maybe I'm a helpless thing
