

## Second Life Syndrome

Riverside

From day to day  
From hand to mouth  
We're turning around  
Vicious ritual  
Getting used to it all  
Falling down again  
We're waiting for  
The decrees of providence  
I don't want to waste  
Any more of my life  
Live from day to day  
Live from hand to mouth  
Facing the light  
I brush aside your plans  
I'm going to have  
It all my own way  
And when that all shattered I felt I'd broken my fall  
Couldn't pretend that I felt strong about us anymore  
Without your help I finally started to live my own life  
I just want you to know this time

I just want to feel your sigh on my neck  
Want to feel your breath  
Feel your need to stay  
You don't know my name  
Don't know my face  
Only thoughts I share in my secret place  
Secret exhibition  
Cure for loneliness  
I've ground to a halt  
There's no turning back  
You know there are things I just can't forget  
You've helped me so much  
To learn to be detached  
But when that all shattered I felt I'd broken my fall  
Couldn't pretend that I felt strong about us anymore  
Without that help I finally started to live my own life  
And I know I don't need you now  
Secret exhibition  
Cure for loneliness  
Life is much too short to be whiled away with tears  
Secret exhibition  
Cure for loneliness  
I erase you now  
I don't need you now  
I erase you now with all of my past
