

I spend a lot of out of out of town for you  
A panorama view  
To capture you and all your attributes  
To get it counted when it's needed (oh)  
I've been up and down and out for you  
I lost and found a few  
We been through worse, I never doubted you  
You take my ego and you feed it (you feed it)  
Gotta wash that car, it's a Nissan  
Deja vu like a rerun  
So many episodes I'm seasoned  
These winners don't freeze up  
We often value what we need most  
You still find Jacksons without Tito  
My ego has gotten bigger  
The more I ball  
Like an eagle catching flights and missing calls  
Both sides done played our parts  
But our bloodline is flowing through these scars  
We done been through it all but

No matter all the fights we got into  
It wouldn't be life without you  
I've been out so many nights without you  
I paid the price to prove I got you  
Show you that I value you, you  
I just want to prove I value you, you

Man this shit could be ours with Y on it  
Cake with ice on it  
Go together like Patron and pry hold it down  
Not chase you till your core caught up  
They fell not us  
Thrown to the ground, caught us  
Ballers with your Mille watches  
They watch us  
Shop for LA casa blow, fish pasta  
With basslets in the head rest  
Sick of your last nigga come and bedrest  
With your tan best friend who looks like Cassie  
Nigga wanna join and know Jackie  
Run my name so much she bout to lap me  
Vampire nails up my back, deep  
Drug in my sack sheet  
Here as a plus, never minus  
These niggas want your brain  
And I want what's inside it  
Got hoes but your value or u's the highest  
Love and power provide it  
They bow to Your Highness

Show you that I value you, you  
I just want to prove I value you, you  
Show you that I value you, you  
I just want to prove I value you, you
