

Almost There

RKCB

You feel so far away
And I can honestly say
I'm all the way but
I'm almost there now
Dreams then fall away
Keep me calling out your name
Encrypted holotape
And I'm almost there now
I'm almost there now
I'm almost

Here, here, here
It's a whole new day now
Let the love we make come out
Let the love we
Here, here, here
It's a whole new way around
Let the love we make come out
Let the love, let the love we

It feels so far away

Used to taste the same
Peel away the face you make
You're not all the way, but
You're almost there now

We're on a northern plane
A tidal wave and its ocean
I wanna stay in this emotion
We're almost there now

Here, here, here
It's a whole new day now
Let the love we make come out
Let the love we
Here, here, here
It's a whole new way around
Let the love we make come out
Let the love, let the love we

Let the love, let the love we
It feels so far away

Love won't leave you now
You're almost there now
Love won't leave you now
You're almost there now
Love won't leave you now
You're almost there now
Love won't leave you now
You're almost
