

Ghost

RKCB

Tell me where to go
I'll never stop where the road ends
Your eyes are closed
I'm fading

Waking up alone
Even when you're near me
Like your breath in the cold
I'm fading

Back through your lungs, try reviving what's become of us
Or am I better, better, better, better off?

Where did this begin?
Are we lost or just roaming?
Disappear when the air gets thin
I'm falling

Help me get back to you, back to you, back to you, back to you
Help me get back to you, back to you, you, you
Back to your love, try reviving what's become of us
Am I better off?

See right through me, I'm not moving on
Why is your love invisible?
Get the feeling when you're here you're gone
Am I a ghost caught in your air?
Am I a ghost just hanging there?

So tell me where to go
Every night I'm a shadow
There's no light on your road love
I'm fading

There's nothing else left to lose,
left to lose, left to lose, left to lose
There's nothing else left to lose, left to lose, left to lose

See right through me, I'm not moving on
Why is your love invisible?
Get the feeling when you're here you're gone
Am I a ghost caught in your air?
Am I a ghost just hanging there?
