

Borderline

RL Grime

Way past the borderline

Night vision's infrared
You love me bad but I get it right back
When the dust is all cleared
We'll stand along yeah wherever it lands
'Cause there's a place I know we can run to
Undercover till the sun burns out
Build a world by our own design
You and I

Past the borderline
Somewhere in the distance
Where two worlds collide
It's right in front of us
Put your hand in mine
Even though the stars will not align
It's still you and I
It's still you and I

Did you ever realize
That you were stillness of the tracks
Watch the needle on the ride
Just keep on driving and you'll find your way back
'Cause there's a place I know we can run to
Undercover till the sun burns up
Build a world by our own design
You and I

Past the borderline
Somewhere in the distance
Where two worlds collide
It's right in front of us
Put your hand in mine
Even though the stars will not align
It's still you and I
It's still you and I

Say you love me, say you love me
Say you love me, say you love me, say you love me
Say you love me, say you love me, say you love me
Say you love me, say you love me
Past the borderline
