

## Learn (Altered)

R.LUM.R

It's been awhile since we've spoken  
It's hard to find words to say  
Cause all we got left in common  
Is how long we been this way

Remember when I left your city  
Remember when we had that talk  
I made sure that I woke up early  
I never missed your call

Been a while since we've spoken  
Ashamed of how long it takes  
To say what I'm sure you've noticed  
The anger might never fade

But don't worry  
We can't hurry  
It's gonna take some time  
To unravel  
This state of mind

After everything we say  
All we do is hesitate  
To learn to love each other  
To learn to love each other

Even though we separate  
It's never gonna be too late  
To learn to love each other  
To learn to love each other

It's been awhile since we've spoken  
I'm not sure where to go from here  
Cause I don't wanna not say something  
But I don't wanna live with fear

I'm scared of what you're withholding  
I'm scared of what I might say  
I know that we're worth the struggle  
And love can outlast the pain

But don't worry  
We can't hurry  
It's gonna take some time  
To unravel  
This state of mind

After everything that we say  
All we do is hesitate  
To learn to love each other  
To learn to love each other

Even though we separate  
It's never gonna be too late  
To learn to love each other  
To learn to love each other

After everything that we say  
All we do is hesitate  
To learn to love each other  
To learn to love each other

Even though we separate  
It's never gonna be too late  
To learn to love each other  
To learn to love each other
