

# Open Water

ROAM

(Nature had it first)

Wake up and stare at the screen  
Disbelief as the words read out another ending  
And tell me all of the things that you think when we drove ourselves  
into depending  
I don't want us to face the mess  
The mirror said forget the rest  
So tell me will we ever find a way  
To paint the road for better days

Am I gonna stay the same  
Will I ever see the day  
When the thoughts inside my head are not too afraid to change  
Are we gonna stay the same  
I know we're gonna see the day  
When our words are heard from far away  
We won't let this world decay  
We won't let this world decay

So tell me when the engine fails and the train derails  
Will we all just fade away  
Cause I know that the well dried up never had enough  
So we all just bring the rain  
I heard the score a thousand times before  
So tell me will we ever see consistency lying on the floor

Am I gonna stay the same  
Will I ever see the day  
When the thoughts inside my head are not too afraid to change  
Are we gonna stay the same  
I know we're gonna see the day  
When our words are heard from far away  
We won't let this world decay

In open water we drifted deeper  
We're falling faster now  
In open water we drifted deeper  
We're falling faster now

Am I gonna stay the same (No!)  
Will I ever see the day  
When the thoughts inside my head are not too afraid to change  
Are we gonna stay the same  
I know we're gonna see the day  
When our words are heard from far away  
We won't let this world decay  
We won't let this world decay
