

# New Year's Day

Rob Thomas

Turning back, looking through photographs  
Of all the memories that we've made  
We draw the lines, until they intertwine  
Tie around the mess we've made

We hope it unwinds  
All in good time

And if you wanna see my face  
I'll be here on New Year's Day  
To pray the night won't end us  
And the morning sun still blesses us  
Another song to play  
And maybe if the music stays  
We'll dance around the past until  
The only thing that's left is New Year's Day

Candle light  
Gather around tonight  
The calm before the big parade  
I'm falling now  
I'm melting into the ground  
Then your voice calls out my name

And time's just a flame  
That burns 'til it fades

And if you wanna see my face  
I'll be here on New Year's Day  
To pray the night won't end us  
And the morning sun still blesses us  
Another song to play  
And maybe if the music stays  
We'll dance around the past until  
The only thing that's left is New Year's Day

And we'll raise a glass to every new sunrise  
And the love that still survives

But if you wanna see my face  
I'll be here on New Year's Day  
To pray the night won't end us  
And the morning sun still blesses us  
Another song to play  
And maybe if the music stays  
We'll dance around the past until  
The only thing that's left is New Year's Day
