

## Hand In Hand With The Blues

Robben Ford

I watch the streets outside my window  
I wait but I know you'll never come  
The world goes passing by  
People laugh and babies cry  
Never knew I had so much to lose.

You introduced me to a new companion  
When you left me standing in the rain  
Anyone looking would've watched me go  
Walking hand in hand with the blues  
Hand in hand with the blues.

I watch the streets outside my window  
I wait but I know you'll never come  
Night falls and I draw the blinds  
The will to live gets harder to find  
I can't bring myself to face the truth

Another king of the brokenhearted  
Someone to share my pain  
Anyone looking would've watched me go  
Walking hand in hand with the blues  
Hand in hand with the blues.

The empty hours they move so slowly  
Cold sorrow sinks into my bones  
Night seems to never end  
Pour a drink from a new found friend  
Trying to drown the pain of losing you.

We're gonna go down that road together  
And I'll never see you again  
Anyone looking would've watched me go  
Walking hand in hand with the blues  
Hand in hand with the blues.  
Hand in hand with the blues.  
Hand in hand with the blues.
