

## Ms Pepper

Robbie Williams

Not your normal city girl  
Getting caught up with the world  
Dressed up for the city lights  
She's going home but not tonight  
Yes I've known her for a while  
She kinda got used to my smile  
Its gone in and out of style  
And everybody knows it

We've been holding back  
And there's some history to that  
But we're on fire, fire, fire

Do it, do it you crazy angel  
So in tune with magic  
Don't be a stranger  
Cause I know that you know  
When we get together  
There's never been a better time  
Never been a better time than now

Guess I found some courage now  
Just to tell you what goes down  
In my mind when you're not around  
I hope you feel the same way too  
Got a photograph of you  
I always stop when I flick through  
Man it's such a lovely view  
I don't want to spoil it

We've been holding back  
It's such an unnatural act  
But we're on fire, fire, fire

Do it, do it you crazy angel  
So in tune with magic  
Don't be a stranger  
Cause I know that you know  
When we get together  
There's never been a better time  
Never been a better time

Do it, do it, you crazy angel  
So in tune with magic  
You could be my savior  
Cause I know that you know  
When we get together  
There's never been a better time  
Never been a better time than now

Why do you have to leave me now  
You don't have to leave me  
Why do you have to leave me now  
You don't have to leave me

Why do you have to leave me now  
You don't have to leave me

Why do you have to leave me now  
You don't have to leave me

Love me, love me you crazy angel  
So in tune with magic  
Don't be a stranger  
Cause I know that you know  
When we get together  
There's never been a better time  
There's never been a better time

Love me, love me, you crazy angel  
So in tune with magic  
Don't be a stranger  
Cause I know that you know  
We'll be here together  
There's never been a better time  
There's never been a better time than now
