

# When You Know

Robbie Williams

Bad love mediocre sex  
Didn't care who's coming next  
Nights spent rolling out for danger  
Days spent waking up with strangers  
Leave,  
You're not as strange as me

Drinking drugging Rock n Roll  
Appliances you put in holes  
Super models, movie stars  
Waitresses and girls from Mars weren't you  
They just weren't you

She said I love you so  
Maybe its easy, its easy  
How could I ever know  
Things ain't been that easy, that easy for me  
But when you know, you know  
This one I'll never let, never let go

Hard to know which lies to keep  
Talking in someone else's sleep  
You wear a mask for long enough  
You just forget to take it off  
Not you, you could see right through

Around you I'm just myself  
And baby its easy, its easy  
When I found you, I found myself  
You made it so easy, so easy for me  
But when you know you know  
This one I'll never let, never let go

I built a kingdom, up on a hill  
If you hadn't found me, I'd be there still  
Up on that hill, your tank rolled right through  
Love's a revolution, a revolution for two

She said I love you so  
Maybe it's easy, it's easy  
How could I ever know  
She hates the same people as, people as me  
But when you know, you know  
This one I'll never let, never let go
