

This Changes Everything

Robert Glasper

This changes everything
This changes everything
This changes everything
This changes everything
This changes everything
This changes everything
This changes everything
This changes everything
This changes everything
This changes everything

I met a woman, she loved me but got a wedding ring
She said her nigga don't know anything
Oh, that changes everything
We on the better things
I met a singer she always snorting I don't know who she be sucking my dick i
ncredibly
That changes everything, that changes everything
That changes everything, that changes everything
I remember in church they said boy, you better sing
And now I travel the world up, places I've never seen
This changes everything, this changes everything
This changes everything, this changes everything
I got some homies in Compton who still gang-bang
They always robbin' and sellin' that methamphetamine
That don't change anything, that don't change anything
That don't change anything, that don't change anything
I got the melody, that's why your aunties and uncles always be playing me
And I ain't moving a muscle until they paying me
That changes everything, that changes everything
This changes everything, this changes everything

Hey yo, Denzel, where you at?
This changes everything
Divorce to wedding ring
From sober to methamphetamine
From hunger to feta cheese
You give up anything, that changes everything
Bikes for Eversten
Threat it like whatever thing
It's a now or never thing
Regarding living life, besides
We in a circle from what Lion King writes
The cycle built, destroy, and revise you
Cut the dress from a reverb, follow the primal instinct
That I in-sync with no iTunes
So blessed to have everything praying till high noon
It's a great day for the beach
Until the typhoon hits
Likely you could lose your shit
See change is the coin for the term called season
Mama said people don't change for no reason
Used to be illiterate now I'm the one reading
Used to be a follower now I'm the one leading

This changes everything
This changes everything

This changes everything
