

# Beautiful Nightmare

Robert Grace

Tell me something, you ain't gotta lie, no  
Am I just another on the side oh?  
I don't wanna be a little psycho  
But I might though oh oh  
Always got me feeling like I'm second best  
Keeping all your cards close to your chest  
Secrets go deep but I should have guessed  
What a mess oh oh

I kinda like you (Like you), kinda hate you (Hate you)  
I just want, I just need, I just crave you  
Like a drug, now (Drug now), got me strung out (Strung out)  
Feel so high like I never wanna come down

Even though I know I'll end up like the ones you've hurt before  
I'm still gonna crawl back every time you call back  
And we both know why oh oh  
Every night you go, I'll play and find another heart to break  
Shadow's standing right there even though I'm quite scared  
You're a beautiful nightmare

You got all this blood on your hands from these bodies  
You don't need to steal any hearts from no body  
I'm about to make any plans with somebody  
And if you've got anybody else you've gotta switch up your story

I kinda like you (Like you), kinda hate you (Hate you)  
I just want, I just need, I just crave you  
Like a drug, now (Drug now), got me strung out (Strung out)  
Feel so high like I never wanna come down

Even though I know I'll end up like the ones you've hurt before  
I'm still gonna crawl back every time you call back  
And we both know why oh oh  
Every night you go, I'll play and find another heart to break  
Shadow's standing right there even though I'm quite scared  
You're a beautiful nightmare

You're a beautiful nightmare

Haunted by your voice, it calls me  
Conjuring my mind again  
Disappear without a warning  
Fall into the bitter end  
When I start to heal again  
I feel the darkness creeping in  
Shadow's standing right there even though I'm quite scared  
You're a beautiful nightmare

I'm still gonna crawl back every time you call back  
You're a beautiful nightmare  
Shadow's standing right there even though I'm quite scared  
You're a beautiful nightmare
