

I Cried

Robert Plant

I cried, babe - oh, I cried
I saw you in a movie - or was it on my wall
I never dreamed you'd talk to me - I never dreamed at all

You fitted very strongly - you might have changed my life
Oh, I was very young then - you came along just right
This is what I cried
Now you know I cried

I walked the stellar ceiling - my feet were off the ground
You talked of something permanent when Saturday comes round
This is what I cried
This is why I cried
This is what I cried
Now you know I cried

Kisses gone crazy - come on, tease me 'till I scream
Promise is a maybe, running through my dream
It's what I hear you whisper, soft across my room
Chase my whole confusion - wrest me from my gloom
This is what I cried
Now you know I cried

Your eyes are where the summer lives in pools of quiet fire
Come mess with my sincerity - go down on my desire
I feast on your expression - the smile that tells it all
On my mind forever - forever on my wall
This is what I cried
Now you know I cried
This is what I cried
This is what I cried
