

Natural Fact

Robin Trower

You had to see the lights from the other side
Now the situation's tight you're on the slide
Well things didn't go your way so you had to run
And now you think "well, okay but where's the fun?"

It's a natural fact - opposites attract
It's a natural fact - call it destiny

Now it's cold out on the street and the night is long
And the music you found so sweet is just a siren song
Now you dream about a home you used to hate
You don't have to be alone it's not too late

It's a natural fact - opposites attract
It's a natural fact - call it destiny
