

# Holding On

Robotaki

Oh baby, won't you shed a light on me  
What am I supposed to do  
Dancing in the middle of your gravity

Can't you see that  
We're running in circles again  
Cause' you only care when I walk away  
That's why you always have it your way

And you don't even notice  
The higher we climb, the harder I fall  
And I've been standing right here (here)  
You know I've been holding on for too long

Holding on for too long  
You've been running away with my love  
You know I've been holding on too long.

Oh baby, tell me what's the ending  
I'll stick around to be  
Stuck in the middle of your gravity

And you don't even notice  
The higher we climb, the harder I fall  
And I've been standing right here (here)  
You know I've been holding on for too long

Holding on for too long  
You've been running away with my love  
You know I've been holding on too long.

We could be so good  
You can make it right  
We can crash and burn  
Make it worth the fight  
But you're scared to feel  
It's all in your mind

Oh. and you don't even notice  
And I've been standing right here.  
You know I've been holding on for too long.

And you don't even notice  
The higher we climb, the harder I fall  
And I've been standing right here (here)  
You know I've been holding on for too long  
(Holding on for too long)  
(Holding on for too long)
