

I Want You

Robotaki

Every time you go, wish I could be there
Babe, you gotta know, that I really care about you
I said I'd never fall the way I fell for you
And though I try to fight it, can't escape the truth

First thing on my mind, night until the morning
You must be a criminal, how badly you're wanted

You know it, baby, you know it, baby, you know it's true
You know that, baby, you know that, baby, that I want you
You know that, baby, that I want you
You know that, baby, you know that, baby, that I want you
I want you

First thing on my mind, night until the morning
You must be a criminal, how badly you're wanted

You know it, baby, you know it, baby, you know it's true
You know that, baby, you know that, baby, that I want you
I want you
