

## Right Time

Robotaki

Why you only lonely in the night time  
Always call me up but it never is the right time  
You just wanna fuck, but you never show the right signs  
I've been moving up, and I know you're not the right guy

Now is not the right time  
Never is the right time  
Never is the right time  
Never is the right time

Just got off the plane, and now I'm in the city  
Left my heart at home, but I brought all my dreams here with me  
Just a girl all alone, no team, you and me  
This is really what it means to be 18 in the city  
I've been out on the road, for all of my shows  
Just thought you should know why I don't pick up the phone  
Trying to find a home, 'cause I've got evicted  
Now I'm back at the bar but I feel like something's missing

Why you only lonely in the night time  
Always call me up but it never is the right time  
You just wanna fuck, but you never show the right signs  
I've been moving up, and I know you're not the right guy

Now is not the right time  
Never is the right time  
Never is the right time  
Never is the right time

I'm done with you, so done with you  
Like I never had no fun with you  
No fun with you  
Now I think I see the big picture  
The clear picture, the real picture  
Now that I never have to deal with you

Right time  
Never is the right time  
Never is the right time  
Never is the right time
