

Something From Nothing

Robotaki

My mind is always pulling strings above
What is real, I've simply had enough
I know it now "You have to call the bluff
Just close your eyes, and let it be"

Am I wrong to let my mind be free
So it takes a new reality
You can leave, just don't forget the key
Because tonight I'm letting me be me

I don't wanna be this way forever
Gonna give it all for the pleasure
I just wanna feel a little something
Think it's gonna be better than nothing

I take a breath and feel it all around
Electric touch, we're flying on a cloud
Iridescent colours, life abound
Soon this world will be our playground

I don't wanna be this way forever
Gonna give it all for the pleasure
I just wanna feel a little something
Think it's gonna be better than nothing

I can feel it in heart right now
Nothing in this world can touch me now
Life is easy when we live without doubt

I can feel it in heart right now
Nothing in this world can touch me now
Life is easy when we live without doubt

Nothing in this world can touch me now
