

# Dopamine

Robyn

Dopamine  
Dopamine

I know it's just dopamine  
But it feels so real to me  
I'm tripping on our chemistry  
It's firing up inside of me  
I just need to know  
That I'm not alone  
I know it's just dopamine  
But it feels so real to me

Nothing's ever going to cut you as deep  
As the very first time  
Nothing's ever going to taste just as sweet  
As when it is just out of reach  
No one in this world was ever as free  
Oh baby, there's no limit  
Something here's opening deep inside of me  
I can finally reach it

I know it's just dopamine  
But it feels so real to me  
I'm tripping on our chemistry  
It's firing up inside of me  
I just need to know  
That I'm not alone  
I know it's just dopamine  
But it feels so real to me

This is one of those ones where you've just gotta give in  
I'm going to give it my all  
This time, it's going to be whatever, and that's cool  
I'm wearing my heart on my sleeve  
I need to get out of this rubber coat  
Baby, I can't hold it  
Everything's bubbling 'round up side my mind  
And when I let go, it's so easy

I know it's just dopamine  
But it feels so real to me  
I'm tripping on our chemistry  
It's firing up inside of me  
I just need to know  
That I'm not alone  
I know it's just dopamine  
But it feels so real to me

I know it's just dopamine  
But it feels so real to me (But it feels so real)  
I know it's just dopamine  
But it feels so real to me
