

It's On

Rock Star Supernova

I feel suspended, lifeless
Going through the motions
You're inside, outside
Waiting for the cars
Desperate measures
But it don't measure nothing
All the baggage left inside and nowhere left to fall

All your spaces
Darkened places
Come out
From it all

Let it shine on
Even when the day is done and all the light is gone
Let it shine on
You're running high but dark inside
What little light has left you and shines on

Talking senseless
Screaming from the benches
Looking forward
Not to fall behind
Look through lenses
Nothing ever cleanses
Your rained out visions
From a cloudy mind

All your spaces
Darkened places
Come out
From it all

Let it shine on
Even when the day is done and all the light is gone
Let it shine on
You're running high but dark inside
What little light has left you and shines on

I don't ever want to fade away
A burned out record that I can't play
Don't let me make the same mistakes
That you have made before
Nothing changes
Can't you face it
After all

Let it shine on
Even when the day is done and all the light is gone
Let it shine on
You're running high but dark inside
What little light has left you and shines on
