

## Young Livers

Rocket from the Crypt

Working, another victim in the pot  
Too many holes in your story, Jean's alright  
The run-around runs around and goes to the top  
Hot-wired hands, then make them pop  
Count down a riot is another no show  
Feed our heads and watch them blow

Hey we're alright  
We're just lazy and out of sight  
The young livers rule tonite

My hands were just untied  
So I'm using my fist to buy me time  
The run-around runs around and goes to the past  
Maude, let the young livers pass  
We're so strong and we're so feared  
They're gonna look back and never knew we're here

The run-around runs around and goes to the top  
Hot-wired hands, then make them pop  
Count down a riot is another no show  
Feed my head and watch it blow
