

Burn Something

Rodney Atkins

We get off on the flame
I know we said we're through
But here it comes
Here we go again
Even though every time we do
We burn something

We ain't no walk in the park
We're like sparkin' kerosene
We're better off apart
But dammit girl I need
To burn somethin'

So tonight come lay down by my side
Bite my lip, light me on fire
Get this bed so hot we should be running
Run your fingers down my back
Only you can strike that match
Love me just like we ain't learned nothing
Baby let's burn something

Till there's no more flame to feed
All the smoke is all smoked out
We'll deal with the ashes when tomorrow rolls around

But tonight come lay down by my side
Bite my lip, light me on fire
Get this bed so hot we should be running
Run your fingers down my back
Only you can strike that match
Love me just like we ain't learned nothing
Baby let's burn something
C'mon baby let's burn something

Like the bridge we keep rebuilding
Just to send it back up in a blaze baby
'Cause we can't get enough

So tonight come lay down by my side
Bite my lip, light me on fire
Get this bed so hot we should be running
Run your fingers down my back
Only you can strike that match
Love me just like we ain't learned nothing
C'mon baby let's burn something
C'mon baby let's burn something
Baby let's burn
