

## Figure Out You (Riddle)

Rodney Atkins

There's a smoke ring halo over your head  
Well, you stop on green and go on red  
You say the dirtiest things in the prettiest drawl  
You ain't scared to jump but you're afraid to fall

You keep me beautifully confused  
First kiss I stole I knew  
I wanna spend the rest of my life trying to figure out you

Well, I can't make you love me if you don't  
And leave this long-haired country boy alone  
In the mirror while you're putting on your make up  
I'm thinking fast ball, you throw me a change up  
You're my favorite wonder of this world  
I got a million crazy questions, girl  
But only one I know the answer to  
I wanna spend the rest of my life trying to figure out you

You me push me away and say where you been  
You never wanna see me till you see me again  
You're my cloud 9 high and all time low  
It's a pricey deal but I'm still sold

You keep me beautifully confused  
First kiss I stole I knew  
I wanna spend the rest of my life trying to figure out you

Well, I can't make you love me if you don't  
And leave this long-haired country boy alone  
In the mirror while you're putting on your make up  
I'm thinking fast ball, you throw me a change up  
You're my favorite wonder of this world  
I got a million crazy questions, girl  
But only one I know the answer to  
I wanna spend the rest of my life trying to figure out you

Well, I can't make you love me if you don't  
And leave this long-haired country boy alone  
In the mirror while you're putting on your make up  
I'm thinking fast ball, you throw me a change up  
You're my favorite wonder of this world  
I got a million crazy questions, girl  
But only one I know the answer to  
I wanna spend the rest of my life trying to figure out you  
The rest of my life trying to figure out you
