You know I love you baby you know I need you too
The life I lead is all I need to make my dreams come true
It was a July night in Houston when first I felt your heat
Girl you look so fine in that jukebox line that I forgot I had
two left feet

You know I want you baby you know I need you so
The love you make gives me the shakes from my head down to my t
oes

Your love is something smoking your love is something hot When I feel the storm rolling in your arms I'm gonna give you e verything I've got

Every beat of your heart is like a bolt of blue lightning You heat up the night like a hot summer wind The taste of your lips just sets me on fire Everywhere I turn got love to burn again

I love to please you baby and smell your sweet perfume
The way you walk and the way you talk just keeps me on the moon
Your love is high explosive there's dynamite in blue jeans
Anytime you choose to light that fuse you're gonna blow us all
to smithereens

Every beat of your heart
Everywhere I turn got love to burn again

Everywhere I turn got love to burn again
