

## California

Rogue Wave

Screw California  
And friends that are never there  
And places that they oughta  
Pretend that they even care

From a false family, she could light you up  
Like a holiday tree in the summer

So lead us there

So screw California  
And ice that will never melt  
From hearts of the modern  
Children of Cicero

From a false family, she could light you up  
Like a holiday tree in the summer

So lead us there
