

Cold Side

Romain Virgo

Don't you know
You're beautiful, woman
Woman, hey-ee, hey-ee

She's standing in the corner
Living her life away
Don't care about tomorrow
Just wanna take her pain away
I wish I could change her mind
An' then just run away
But after everything I tried
She stayed

Living on the cold side of life
She thinks it's the gold side of life
Walking on the cold side of life
Won't you let me save your life

Pretty little figure, everybody's favourite
When you're on the pole
He makes you believe he care, but
His hear is cold
But if he loves you
Then why did he mess you up
Yes, he wants to have you here forever

Living on the cold side of life
He thinks it's a gold side of life
Walking on the cold side of life
Won't you let me save your life

You deserve better and never knows
Let me solve your pain and sorrows
Hello, this I real love knocking at your door
Baby, you need some protection
Ask someone to give you in detention
Let love be the injection
You cure with the 'mount of my affection

Living on the cold side of life
You think it's a gold side of life
Walking on the cold side of life
Won't you let me save your life

She's standing in the corner
Living her life away
Don't care about tomorrow
Just wanna take her pain away
I wish I could change your mind
Girl, then just run away
But after everything I tried
You stayed

Living on the cold side of life
