

# Red Light

Roman Alexander

I can't take back time  
Can't undo all the wrong I've done  
Can't unpack her bags  
Can't tell them 4 wheels not to run  
I've got a feeling this times different  
She ain't gonna turn around  
I got a hail Mary if you're listening  
I'm on my knees right now

I'm praying for a red light  
Stop and make her think twice  
Before she fast lane flies out of my life  
Give her just enough time for a memory  
To hit her like the rain falling  
God I know it's a long shot  
There's only so many small town blocks  
Before them high beams hit the highway  
And she's over me  
I'm praying for a red light

Make her think of Carolina  
When we were white sand and counting stars  
Oh for heaven's sake make her hit that brake  
Maybe have it change her heart

I'm praying for a red light  
Stop and make her think twice  
Before she fast lane flies out of my life  
Give her just enough time for a memory  
To hit her like the rain falling  
God I know it's a long shot  
There's only so many small town blocks  
Before them high beams hit the highway  
And she's over me  
I'm praying for a red light

Get her second guessing that good bye  
Get them Goodyears rolling back in my drive  
I need a rearview miracle tonight  
I'm praying for a red light

I'm praying for a red light  
Stop and make her think twice  
Before she fast lane flies out of my life  
Give her just enough time for a memory  
To hit her like the rain falling  
God I know it's a long shot  
There's only so many small town blocks  
Before them high beams hit the highway  
And she's over me  
I'm praying for a red light

I'm praying for a red light
