

## If We Try

Roman Lob

It felt like eternity  
now we've run out of time  
I was so sure  
that you would always be mine  
Never imagined to lay here and pray  
seakin' face, speakin' words  
I never thought I would say  
This true love was a gift  
And now we drift in the dark  
You wanted me to let you in  
but I just hurt you, baby  
Please give me a chance  
I need you here by my side  
to make a difference, make it right  
We can move mountains if we try  
Please give me a chance  
I know this love can not lie  
and all this love can not die  
we can move mountains if we try  
Aaah, ooh ooh  
I thought I knew evrything  
but I know nothing at all  
But I thought I've been loved  
was just the pride before the fall  
And I wish I could undo  
all this pain that I've caused  
Wanna make this love a better one,  
a better one  
Your true love was a gift  
And now we drift in the dark  
You wanted me to let you in  
but I just hurt you, baby  
Please give me a chance  
I need you here by my side  
to make a difference, make it right  
We can move mountains if we try  
Please give me a chance  
I know this love can not lie  
and all this love can not die  
we can move mountains if we try  
Aaah, ooh ooh  
Aaah, ooh ooh  
We can move mountains if we try  
Please give me a chance  
I need you here by my side  
to make a difference, make it right  
We can move mountains if we try  
Please give me a chance  
I know this love can not lie  
and all this love can not die  
we can move mountains if we try  
Please give me a chance  
I need you here by my side  
to make a difference, make it right  
We can move mountains if we try  
Please give me a chance  
I know this love can not lie

and all this love can not die  
we can move mountains if we try
