

Girl, you got me realize  
I can never forget the way we used to be together  
Girl, it comes with no surprise  
I can never forget the way you made me run and hide  
Girl, you got me realize  
I can never forget the way we used to be together  
'Cause when I used to see the light  
I can never forget the way you took me out of sight

Girl, you got me realize  
I can never forget the way we used to be together  
Girl, it comes with no surprise  
I can never forget the way you made me run and hide  
Girl, you got me realize  
I can never forget the way we used to be together  
'Cause when I used to see the light  
I can never forget the way you took me out of sight

Can you feel it?  
I know that we found a way out  
Can you see it?  
We'll go back  
Don't try to stay out

Let me fall back in for a moment  
Feel alive for just one night  
Hear you call my name for a moment  
Still I try  
Still I try

Girl, you got me realize  
I can never forget the way we used to be together  
Girl, it comes with no surprise  
I can never forget the way you made me run and hide  
Girl, you got me realize  
I can never forget the way we used to be together  
'Cause when I used to see the light  
I can never forget the way you took me out of sight
