

MORALITY \$UICIDE

RØRY

I think that maybe there's a problem on this planet
When did war become our universal language
They drop bombs and turn a hospital to ashes
That's collateral damage

There's people starving children dying in this madness
And politicians funding wars with people's taxes
And they found oil but they can't find a cure for cancer
There's profit in disaster

You took your faith and you burned it alive
You wrote your name in a phosphorus sky
Who cares who lives when you've already died
Morality suicide
Morality suicide

Their enemies are refugees stood at the border
Big Corporations putting poison in the water
They're up in arms when someone's son becomes their daughter
I'm tired of this torture

I'm tired of the lies in the government too
It's not genocide if it's not on the news
This ain't a democracy
This is hypocrisy
This is atrocity

You took your faith and you burned it alive
You wrote your name in a phosphorus sky
Who cares who lives when you've already died
Morality suicide
Morality suicide

Suicide
Morality suicide
Who cares who lives when you've already died
Morality suicide
Morality suicide
