

White Wave

Roses & Revolutions

Cool it down with purple and blue
First colors that I showed to you
Yellow and green now take their place
Same boy with a different face

Dressed in black from head to toe
Hood up so they'll never know
The innocence of an eye
Gives away your alibi

When you've lost something that you cannot find
Like a memory in the back of your mind
And when the drugs kick in I'll be feeling fine
Gonna ride the white wave tonight
Ride the white wave tonight

When red shows up I lose control
Punches in the air but they're just for show
Wind me up and let me go
It's a feeling that we lost that you'll never know

When you've lost something that you cannot find
Like a memory in the back of your mind
And when the drugs kick in I'll be feeling fine
Gonna ride the white wave tonight
Ride the white wave tonight

Cool it down with purple and blue
Won't fix what you put me through
Yellow and red now end the day
Some scars never fade away

When you've lost something that you cannot find
Like a memory in the back of your mind
And when the lights kick on I'll be feeling fine
Gonna ride the white wave tonight
Ride the white wave tonight
